

TCL BOOKSTORE TEXTBOOK AFFORDABILITY MODELS

Inclusive Access (IA)

Courses using the Inclusive Access (IA) model are those to which the price of the electronic/digital textbook is included as a fee in the tuition of the class at the time of registration. The IA model ensures that every student has access to their course materials on the 1st day of class as well as at or below competitive market value. Students have the option to opt-out of this model during the sign-in process to the class/digital textbook.

Cengage Unlimited Books

This is a specific publisher (Cengage Learning) subscription-based electronic textbook. Once purchased from the TCL Bookstore, the student will have access to any electronic textbook that Cengage Learning publishes on their website. In most cases, this is a 1-year subscription, but other purchasing options may be available.

Open Educational Resources (OER)

Educational resources that have been made available for free use under open creative commons licenses or are in the public domain. The OER model ensures that every student has access to their course materials on the 1st day of class at zero or very low cost.

***TCL's faculty have the academic freedom to choose any textbook or textbook model that they believe best meets the needs of their courses and students.**

Questions concerning these affordability models should be directed to the TCL Bookstore Manager: 843-525-8303
